

# ZEPHYR — POWERED BY BDO DIGITAL LABS

## Enhancing Your Business by Making EDI Simple

Electronic Data Interchange (EDI) is the communication of information electronically that was traditionally communicated on paper. While it can help improve efficiency and reduce costs, EDI can be difficult to implement and manage. Zephyr enhances your business and can help make EDI simple.

### How Zephyr Works:

Zephyr managed services combines widely practiced technology, EDI experience, and unparalleled customer commitment to help make EDI easy to manage. Our team of professionals help manage your EDI every step of the way while also providing the following:

- ▶ Set-up, testing, and ongoing support of your EDI relationships
- ▶ Monitor all transaction activity and provide alerts when action is required
- ▶ Process millions of transactions in a secure and timely manner
- ▶ Handle all communication methods (AS2, FTP, SFTP) and data formats (X12, EDIFACT, TXT, XML, etc.)

### BENEFITS

- ▶ Cost-effective EDI transaction processing
- ▶ Rapid compliance with trading partner EDI deadlines
- ▶ Reliable performance with low cost of ownership
- ▶ Full-range EDI solutions that allow you to start small and evolve as needed
- ▶ Scalable performance for both large and small clients
