

Netsuite Addresses Your Toughest Technology Challenges

GOODBYE MANUAL PROCESSES, HELLO AUTOMATION

1 CURRENT STATE

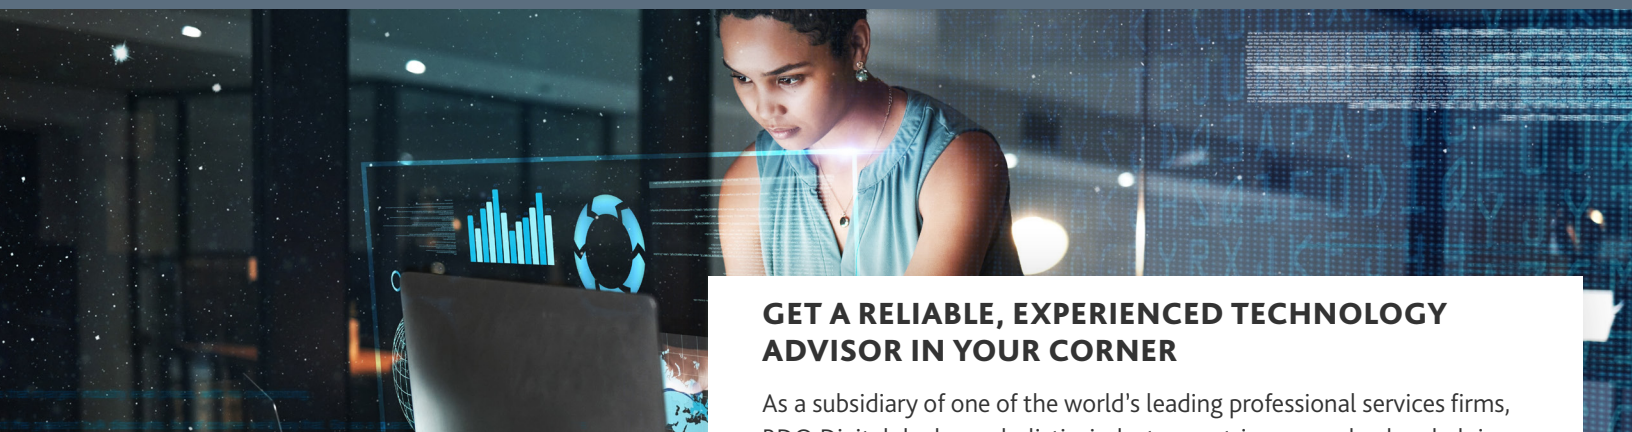

- ▶ If your business is still using manual accounting and financial management processes, it's costing you money.
- ▶ Manual processes are also error-prone and require more repetitive work.
- ▶ If you rely heavily on spreadsheets to share data across disparate software systems, your executives are probably not making the best business decisions quickly enough.
- ▶ Finally, your outdated, on-premises software solutions are costly to license, upgrade and maintain over time.

2 IT'S TIME TO ASK YOURSELF THESE IMPORTANT QUESTIONS

-  Is our staff spending too much time on manual data entry and data cleanup?
-  Are we lacking efficient integration across systems and/or third-party applications?
-  Is our current software unable to automatically download and install new releases and updates?
-  And, does our technology lack scalability?

3 If you answered "yes" to one more of these questions, then it's time to consider a **cloud-based Enterprise Resource Planning (ERP) solution** like NetSuite, which will help you eliminate these problems, gain a unified view of all operational data and improve your overall efficiency levels.

THE NETSUITE-BDO DIGITAL DIFFERENCE

GET A RELIABLE, EXPERIENCED TECHNOLOGY ADVISOR IN YOUR CORNER

As a subsidiary of one of the world's leading professional services firms, BDO Digital deploys a holistic, industry-centric approach when helping companies gain competitive advantage in their respective industries.

BDO Digital offers a broad suite of value-based offerings, strategies and solutions, each of which has an individual practice within a global network of accounting and consulting firms that have locations in more than 167 different countries.

When you work with one of BDO Digital's ERP professionals, you get:

- ▶ Real-time visibility into your operations
- ▶ Actionable insights, improved planning and faster reporting
- ▶ Greater productivity and collaboration
- ▶ Streamlined processes and optimized system performance
- ▶ Reduced total cost of ownership for enterprise IT

As a NetSuite Partner, BDO Digital successfully deploys and integrates innovative, scalable ERP solutions for companies in the manufacturing and distribution, omni-channel commerce, food and beverage, life sciences, non-profit, private equity, real estate and construction, software and technology and transportation and logistics.

- ▶ A complete suite of software applications, NetSuite brings all of a company's data together into a single system.
- ▶ BDO Digital can also integrate NetSuite directly with existing applications like Salesforce and Shopify, among others.
- ▶ Once in place, NetSuite gives team members access to all of the data they need from a single point of entry, thus saving time, reducing errors and improving decision-making across the entire organization.
- ▶ By moving to a single ERP, companies can streamline their processes, automate reporting and free up valuable resources to focus on more strategic assignments.
