

DISCOVER RISKS FROM DARK DATA AND LEARN HOW TO ADDRESS THEM

PROTECT & GOVERN SENSITIVE DATA WORKSHOP

80% OF CORPORATE DATA IS "DARK" — IT'S NOT CLASSIFIED, PROTECTED OR GOVERNED.¹

Not long ago, managing data just meant dealing with documents and emails. Pervasive digital technology and the rapid shift to remote work have greatly expanded the information universe. Much of that data becomes stale or unused immediately after creation and contains information that could impose a compliance risk.

ADDRESS COMPLIANCE RISKS HEAD ON

Protecting information — wherever it goes — is critical to help enable trust and meet compliance requirements. But first, you need to know what data you have, where it is, how it's being used, and compliance risks that may exist.

The **Protect & Govern Sensitive Data Workshop** gives you the insights you need to better discover, protect and govern your corporate data.

As your business-critical data expands and your workforce shifts to remote work, having an integrated approach to mitigating and controlling privacy and regulatory risks is more important than ever.

By attending this workshop, our professionals can work with you to:

Document your compliance objectives and strategy, including compliant Teams deployment and use.

Show how to understand, mitigate and protect against potential privacy and regulatory risks from dark data.

Demonstrate ways to accelerate your compliance journey with the latest Microsoft technologies.

Provide actionable next steps based on your needs and objectives.

WORKSHOP HIGHLIGHTS

Understand the hidden compliance risks of dark data.

Assess your organization's dark data risks with Data Risk Check.

Assess your environment against key data protection standards and regulations.

Receive an analysis and report on findings and associated risks.

Learn about tools and services that can mitigate risks.

Explore recommendations and next steps.

Data Risk Check

Compliance Manager Tenant Assessment

Microsoft Purview Portfolio Overview

Recommendations and Next Steps

DATA RISK CHECK UNCOVERS DATA THAT CAN CAUSE A COMPLIANCE RISK

The Data Risk Check is the core activity of the Protect & Govern Sensitive Data Workshop. The activity is spread out over several weeks to allow time to run on top of your cloud infrastructure and surface privacy and regulatory risks in organizational data. Data Risk Check leverages automated Microsoft Purview tools and services to discover data stored in the Microsoft Cloud and identify potential problem areas.

The automated discovery process can help analyze your existing data for:

- ▶ Sensitive information and intellectual property.
- ▶ Unused or "stale" data.
- ▶ Risky or suspicious activities.

The Data Risk Check, in its core, can help identify privacy and regulatory risks in Exchange Online, SharePoint Online, OneDrive for Business and Teams, and can be extended with optional modules to scan on-premises data repositories and Windows 10/11 Endpoints.

WHAT TO EXPECT

By the end of this workshop, leaders in Microsoft compliance can help provide you with a:

- ▶ Data Risk Check report that includes findings and insights from the automated discovery process.
- ▶ A list of recommendations and actionable next steps that can help mitigate the identified privacy and regulatory risks.
- ▶ Clear look into Microsoft's approach to mitigating and controlling privacy and regulatory risks.
- ▶ Compliance Manager Tenant Assessment report with suggestions and top key improvement actions.
- ▶ Set of long-term recommendations on your compliance strategy, with key initiatives and tactical next steps.
