

FINANCIAL ANOMALY DETECTION ANALYTICS

Helping you overcome challenges with financial risk

One of the most challenging aspects of taking a product to market is understanding the associated financial risks. Will you come out on top or struggle to stay afloat? Take out the guesswork with BDO Digital's FADA tool.

BDO Digital's FADA tool is designed to help you facilitate financial risk discovery and guide you to risk focus areas. We blend an approach of business acumen, industry knowledge, and technical skills to help you understand the financial risks and opportunities associated with your product.

- ▶ Visually intuitive reporting
- ▶ Deep breakdown of financial risk
- ▶ Used in over 15 countries

Two Parts:

Financial Risk Overview (FRO)

Our tool breaks down general ledger (GL), accounts payable (AP) and accounts receivable (AR) dashboards by control points and risks scores and shows you the top five risks sliced across various categories.

Control Points Insights (CPI)

We go deeper into the control points driving risk scores at all levels (account, region, department, transactions, etc.) to visualize what is driving key control points and how multiple risks come together to form high, medium, and low risk buckets.
