

INTELLIGENTLY IDENTIFY INSIDER RISKS

MITIGATE COMPLIANCE & PRIVACY RISKS WORKSHOP

93%

OF ORGANIZATIONS ARE CONCERNED ABOUT INSIDER RISKS.¹

For the majority of organizations, external cybersecurity risks have been top of mind for many years. But these organizations are now considering the risks posed by trusted insiders as an equal or even bigger threat. Organizations are beginning to recognize the importance of establishing controls that enable them to quickly identify and manage insider risks.

INTELLIGENTLY INVESTIGATE AND TAKE ACTION ON INSIDER AND PRIVACY RISKS

Detect, investigate and act on malicious and inadvertent activities in your organization — it is critical to ensuring trust, creating a safe workplace and protecting company assets and employee and customer privacy.

The **Mitigate Compliance & Privacy Risks Workshop** gives you the insights you need to understand insider and privacy risks in your organization.

As your business-critical data expands and your workforce shifts to remote work, having an integrated approach that can help quickly identify, triage and act on risky insider user activity is more important than ever.

By attending this workshop, our professionals can work with you to:

Document your objectives and strategy around insider and privacy risks.

Show how to detect, investigate and take action on insider and privacy risks.

Demonstrate ways to accelerate your compliance journey with the latest Microsoft technologies.

Provide actionable next steps based on your needs and objectives.

WORKSHOP HIGHLIGHTS

Uncover hidden insider and privacy risks in your environment.

Monitor user behavior and communications for risky behavior.

Assess your environment against key data protection standards.

Receive an analysis and report on findings and associated risks.

Learn about tools and services that can mitigate risks.

Explore recommendations and next steps.

USER RISK CHECK UNCOVERS RISKS THAT MIGHT BE HARMFUL TO YOUR ORGANIZATION

The User Risk Check is the core activity of the Mitigate Compliance & Privacy Risks Workshop. The activity is spread out over several weeks to allow time to run on top of your cloud infrastructure and discover and identify insider and privacy risks in your organization. User Risk Check leverages automated Microsoft 365 tools and services to monitor user behavior and communication to discover inadvertent or malicious behavior that can impose risk to your organization.

The automated discovery process can help monitor user behavior and communication for:

- ▶ Data leaks, accidental oversharing or malicious intent.
- ▶ Data theft by departing employees.
- ▶ Inappropriate text in business communication.
- ▶ Sensitive information.
- ▶ Conflict of interest.
- ▶ Data overexposure.
- ▶ Cross-border data transfers.

WHAT TO EXPECT:

By the end of this workshop, leaders in Microsoft compliance can help provide you with a:

- ▶ User Risk Check report that includes findings and insights from the automated discovery process.
- ▶ A list of recommendations and actionable next steps that can help mitigate the identified risks.
- ▶ Clear look into Microsoft's approach to mitigating and controlling insider and regulatory risks.
- ▶ Compliance Manager Tenant Assessment report with suggestions and top key improvement actions.
- ▶ Set of long-term recommendations on your compliance strategy, with key initiatives and tactical next steps.
