

## SECURE IDENTITIES & ACCESS WORKSHOP

**“IDENTITY AND THREAT PROTECTION ARE HIGH ON CUSTOMERS' MINDS. GETTING IDENTITY RIGHT IS A CRITICAL PART OF A MICROSOFT 365 PROJECT AND IS THE FIRST PLACE WE START.”**

— *FORRESTER 2020 MICROSOFT 365 ENTERPRISE TOTAL ECONOMIC IMPACT STUDY*

Are you aware of suspicious user and sign-in behavior in your environment?  
Are you threatened by ongoing suspicious requests?

### PROTECT USER IDENTITIES

Identity is today's control plane for digital transformation. Organizational barriers are blurring between who is in and out of your network. Cloud apps and the increasing use of personal devices and remote work mean that data is no longer centralized behind traditional network security.

With identity attacks on the rise, this workshop can help show you how to stop tomorrow's data breaches by securing identities today.

We can help you find identity risks happening now in your environment, gain insights on your application landscape and help improve your identity security posture.

### WHY YOU SHOULD ATTEND

Given the complexity of identities, data, applications and devices, it's essential to learn how to help ensure the right people are accessing the right information, securely. In this workshop, we'll show you how identity is the fundamental pillar of an integrated security philosophy and end-to-end security strategy. By attending this workshop, you can:

- ▶ **Optimize identity.** Identify potential risks related to identity and see opportunities for improvement.
- ▶ **Assess security posture.** Receive a numerical rating of your identity security posture and see how it compares to similar organizations.
- ▶ **Reduce costs.** Help minimize expenses associated with password reset and help desk resources.
- ▶ **Enhance visibility.** Get a sample survey of apps your employees are using and if IT supports them or not.

### WORKSHOP HIGHLIGHTS

Get a rating of your identity security posture and see how it compares to your peers.

Gain insights into apps used in your environment — even ones unsanctioned by IT.

Understand how to prevent identities from being compromised.

Learn how to reduce costs and help improve business agility and security with simplified app access.

## WHAT TO EXPECT

The foundation of cybersecurity is to quickly and correctly identify authorized users and give them proper access to the information and tools they need to do their job. Our goal is to provide you with tools to protect your authorized users' identities so you can authenticate credentials and manage file access while still giving users the freedom to collaborate with others.

We'll work with you to:

- ▶ Understand your identity goals and objectives.
- ▶ Define your existing and desired identity security posture.
- ▶ Provide insights into applications used within your environment (sanctioned and unsanctioned by IT).
- ▶ Showcase core IT and user security scenarios through demos.
- ▶ Develop a joint action plan based on key results, recommendations and next steps.

## WE'LL CUSTOMIZE THE WORKSHOP BASED ON YOUR ORGANIZATION'S NEEDS:

### Project Setup

Secure Score • Application Discovery

### Design and Planning

### Customer Value Conversation

### Key Results, Recommendations and Next Steps

### Demos

## WHO SHOULD ATTEND

The workshop is intended for security decision-makers, such as:

- ▶ C-SUITE
- ▶ Chief Information Security Officer (CISO)
- ▶ Chief Information Officer (CIO)
- ▶ Chief Security Officer (CSO)
- ▶ Identity and/or application owners/decision-makers
- ▶ IT Security
- ▶ IT Operations
- ▶ Security Architect
- ▶ Security Engineers
- ▶ Application business owners
