# SECURE MULTI-CLOUD ENVIRONMENTS WORKSHOP

GET A CUSTOMIZED THREAT AND VULNERABILITY ANALYSIS OF YOUR HYBRID AND MULTI-CLOUD ENVIRONMENT, AND LEARN HOW TO BUILD A MORE ROBUST CLOUD SECURITY SYSTEM

# HELP IMPROVE YOUR CLOUD SECURITY POSTURE WITH A SECURE MULTI-CLOUD ENVIRONMENTS WORKSHOP

As the use of cloud services continues to grow, cyber risks and threats continue to evolve. Get help achieving your hybrid and multi-cloud security objectives — and identify current and real threats — by scheduling a Secure Multi-Cloud Environments Workshop.

We can help you develop a strategic plan customized for your organization and based on the recommendations of security professionals. You'll gain visibility into immediate threats and vulnerabilities across Azure, on-premises and multi-cloud environments, plus clarity and support on how to help improve your security posture for the long term.

#### WHY YOU SHOULD ATTEND

Given the volume and complexity of identities, data, apps, endpoints and infrastructure, it's essential to learn how secure your organization is right now and how to mitigate and protect against threats moving forward. By attending this workshop, you can:

- Identify current security threats and vulnerabilities in your hybrid and multi-cloud environment.
- ▶ Walk away with actionable next steps based on your specific needs and objectives.
- ▶ Document your security priorities and needs for key stakeholders.
- ▶ Better understand how to accelerate your security journey using the latest tools.

## **WORKSHOP HIGHLIGHTS**

Discover threats and vulnerabilities in your hybrid environment.

Learn how to prioritize and mitigate potential threats to your servers and services.

Understand what can be done to reduce the attack surface area for hybrid workloads.

Learn about benefits and capabilities of Microsoft Defender for Cloud and Azure Network Security.

Develop defined next steps based on your needs and objectives.

### WHAT TO EXPECT

During this workshop, we'll team with you to strengthen your organization's approach to hybrid cloud security. We'll help you better understand how to prioritize and mitigate potential attacks:

- ▶ Analyze your requirements and priorities for a hybrid cloud security detection and response solution.
- ▶ **Define** scope and deploy Microsoft Defender for Cloud in the production environment, onboarding servers and other selected services.
- **Explore** Azure Network Security capabilities and experience selected Azure Network Security products in a demonstration environment.
- ▶ **Discover** existing hybrid workload vulnerabilities and learn how to reduce the attack surface area.
- ▶ **Discover** threats to the included hybrid workloads and demonstrate how to investigate and respond to threats.
- ▶ **Recommend** next steps on proceeding with a production deployment of Microsoft Defender for Cloud and Azure Network Security.

Pre-Project Call

Kickoff Meeting

Data Collection

Threat Exploration

Results Presentation

Project Decommissioning

### WHO SHOULD ATTEND

The workshop is intended for security decision-makers, such as:

- Chief Information Security Officer (CISO)
- ► Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Data Protection Officer

- Data Governance Officer
- ► IT Security, IT Compliance and/or IT Operations
- Data Governance
